Introduction to Risk Management

Designed For

Those who want to understand what risks their organisation or project faces; how to identify different types of risk and develop a plan to deal with those risks, enabling their organisation or project to succeed.

Aim

By the end of this course, you will understand how to:

- ✓ Understand what risk is and how it applies to organisations and projects.
- ✓ Be able to identify different types of risk, opportunities and threats within your organisation or project.
- ✓ Understand how to effectively apply the principles of risk management.
- ✓ Be able to apply tools and techniques to identify and treat risks.
- ✓ Have developed a personal action plan for continued development in the workplace

Content

- ✓ Understanding what risk is and risk management principles.
- ✓ Understanding the impact of internal and external risk on organisational performance.
- ✓ Identifying the causes of risk.
- ✓ Identifying risk in organisations and projects, including tools and techniques to assist identification.
- ✓ Assessing the impact of risk on your business: how to evaluate risk, when to accept risk, and when to do something about it.
- ✓ How to control and manage risk and the benefits to your business of doing so, including culture, risk appetite, communications, risk reporting and registers.
- ✓ Prepare and develop a personal action plan to support your return to the workplace.

Duration: one day
